ADVANCED BACKING SYSTEM BEAUTIFUL CARPET

Why evobac?

- Produced from 100% recycled materials
- Less risk of scuffing Skirting's Paintwork and Furnishings
- Reduces wear on blades when cutting
- Improved Anti-fraying properties
- Compatible with conventional installation methods – Stretch Fit and Double stick

Surface Pile Yarn

- 80% premium British wool combined with 20% nylon for added durability
- Natural, renewable and sustainable

Primary Backing

- Post-consumer recycled PET plastic
- High performance
- Sustainable

High Strength Thermoplastic Bonding Agent.

- Durable
- Guarantees against delamination

A journey towards more sustainable production

Unique production system creates an inseparable bond between the primary cloth and secondary backing

At least 3 times the bonding strength of a conventional latex backed product

Unrivalled permanent bonding guarantees against delamination

Ease of handling

Superior tuft bind

Environmentally friendly solvent free thermoplastic technology

Low energy, sustainable secondary backing solution

Lower environmental impact than traditional products
