

newhey

Great British carpet since 1968

Stock Collection

Essence

Mist in situ

About the Collection

Essence is a simple, yet stylish, collection offering eight colourways in a smart stripe suitable for guestroom or general commercial installations.

All our products are manufactured with evobac, a secondary backing made from recycled plastic bottles. Compliant with all standard British and European regulations for flammability and performance, evobac also offers a comprehensive range of benefits for installers including ease of handling, which is guaranteed through decreased risk of scuffing skirtings and paintwork. Other key benefits are improved anti-fraying properties, reduced wear on blades when cutting and compatibility with all traditional installation methods.

Stone

Amber

Flint

Mist

Pattern repeat (L):	0.03m
Pattern repeat (W):	0.02m
Width:	4.00m
Total pile weight:	1,154g/m ² (34.04oz/yd ²)
Pile content:	80% wool / 20% nylon

Barley

All Newhey products can be transformed into area rugs with a selection of edge finishes to suit all tastes and budgets.

For more information please email customer services or call us on 01706 846 375.

One square metre prevents
at least eight plastic bottles
from going to landfill or
entering our oceans.

The benefits

Less risk of scuffing skirtings
and paintwork.

Excellent underfoot comfort

Easier to cut, reducing
wear on blades.

Compatible with conventional
installation methods – stretch
fit and double stick.

How **evobac** is made

1 Plastic bottles are shredded into flakes.

2 The flakes are converted into tape and woven.

3 Next polyester fibre is needled into the woven tape.

4 The result — **evobac**.
