

newhey

Great British carpet since 1968

Stock Collection

# Patina 2.0

## About the Collection

Inspired by oxidation and the effect it has on different surfaces, Patina 2.0 is an extension of the original Patina collection containing a new thought-provoking palette of colours. With a vintage aesthetic and authentic natural feel, this collection offers 4 brand new colourways. Marl takes inspiration from light reflected from metallic surfaces. Laguna explores the mysteries of deep inky blue oceans whilst Cayenne is rich and exuberant and Mineral evokes calm and well-being.

All our products are manufactured with evobac, a secondary backing made from post-consumer recycled PET plastic. One square metre of evobac prevents at least eight plastic bottles from going to landfill or entering our oceans.

Compliant with all standard British and European regulations for flammability and performance, evobac also offers a comprehensive range of benefits for installers including ease of handling, which is guaranteed through decreased risk of scuffing skirtings and paintwork. Other key benefits are improved anti-fraying properties, reduced wear on blades when cutting and compatibility with all traditional installation methods.

Laguna

Cayenne (2018/19/20)

Laguna

Pattern repeat (L):	1.03m
Pattern repeat (W):	2.00m
Width:	4.00m

All Newhey products can be transformed into area rugs with a selection of edge finishes to suit all tastes and budgets.

For more information please email customer services or call us on 01706 846 375.

One square metre prevents at least eight plastic bottles from going to landfill or entering our oceans.

### The benefits

-  Less risk of scuffing skirtings and paintwork.
-  Excellent underfoot comfort
-  Easier to cut, reducing wear on blades.
-  Compatible with conventional installation methods – stretch fit and double stick.

### How evobac is made

1 Plastic bottles are shredded into flakes.

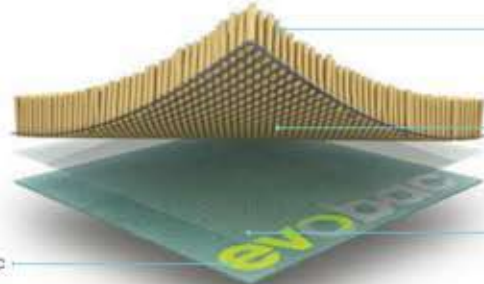

2 The flakes are converted into tape and woven.

3 Next polyester fibre is needled into the woven tape.

4 The result — evobac.

**Surface Pile Yarn**

- High quality 80/20 wool nylon yarn blends
- Natural, renewable and sustainable

**Primary Backing**

- Post-consumer recycled PET plastic
- High performance
- Sustainable

**High Strength Thermoplastic Bonding Agent**

- Durable
- Guarantees against delamination

## Our Story

For over 50 years Newhey has created beautiful wool-rich carpets for the Hospitality and Leisure sectors. The combination of quality design, innovative technology and the best manufacturing expertise results in high quality carpets for hotels, restaurants and bars.

Working hand in hand with designers and specifiers to understand their needs, we act as your design and technical partner to create carpet that is just right for your projects. We are also proud members of the Made in Britain campaign, designing, testing and manufacturing all of our products in the UK.

We employ local people at our site near Manchester benefiting our surrounding community and economy. Our high levels of service and quality would not be possible without the support of our longstanding partners. We rely on the dedication and expertise of local spinners and dyers to ensure our product is delivered on time, on budget and will perform within it's chosen environment.
