Available from
stock.

*UK-manufactured collections, developed for contemporary commercial interiors
and ready to specify with confidence.*

In Stock. Ready to Deliver

For over 55 years, Newhey has specialised in the design and manufacture of high-quality carpets for commercial interiors, with a particular focus on the hospitality and leisure sectors.

Manufactured in the UK and held in stock, our collections are carefully developed to combine design integrity with proven performance, offering specifiers a dependable, design-led solution for a wide range of projects.

Our collections are designed to offer complete flexibility in specification, with no minimum order quantities and the ability to supply both cut lengths and full rolls. All products can also be fabricated into stylish area rugs, with a choice of refined edge finishes.

From boutique hotels to large-scale commercial environments, our collections are created to be specified with confidence, delivering both aesthetic appeal and lasting durability.

All products are available in:

Rolls

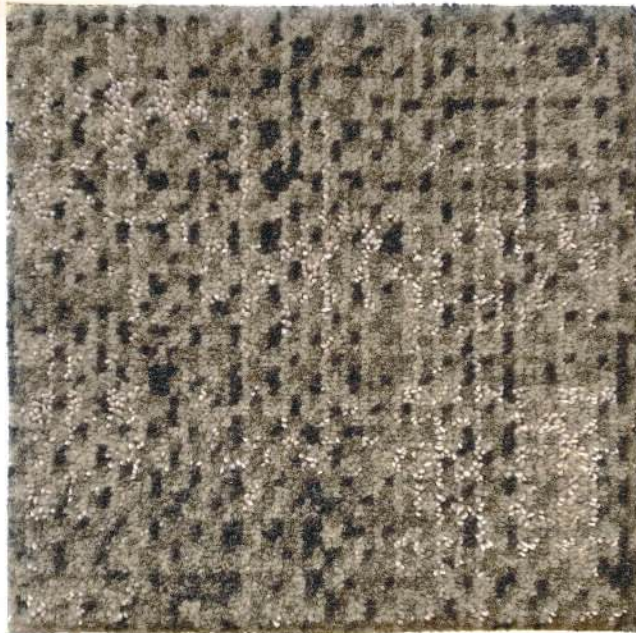

Cuts

Rugs

Designed to Work Around Your Project

Our stock collections are designed to support the realities of modern commercial projects - balancing creative intent with the practical demands of specification, supply and delivery.

Design-led

Developed in collaboration with designers and specifiers, each collection is created with a focus on aesthetic quality as well as performance, offering refined options suited to contemporary commercial interiors.

Flexibility

Designed to work across projects of all sizes, our stock collections can be specified without minimum order quantities, offering the freedom to supply cut lengths, full rolls or smaller, more tailored requirements as needed.

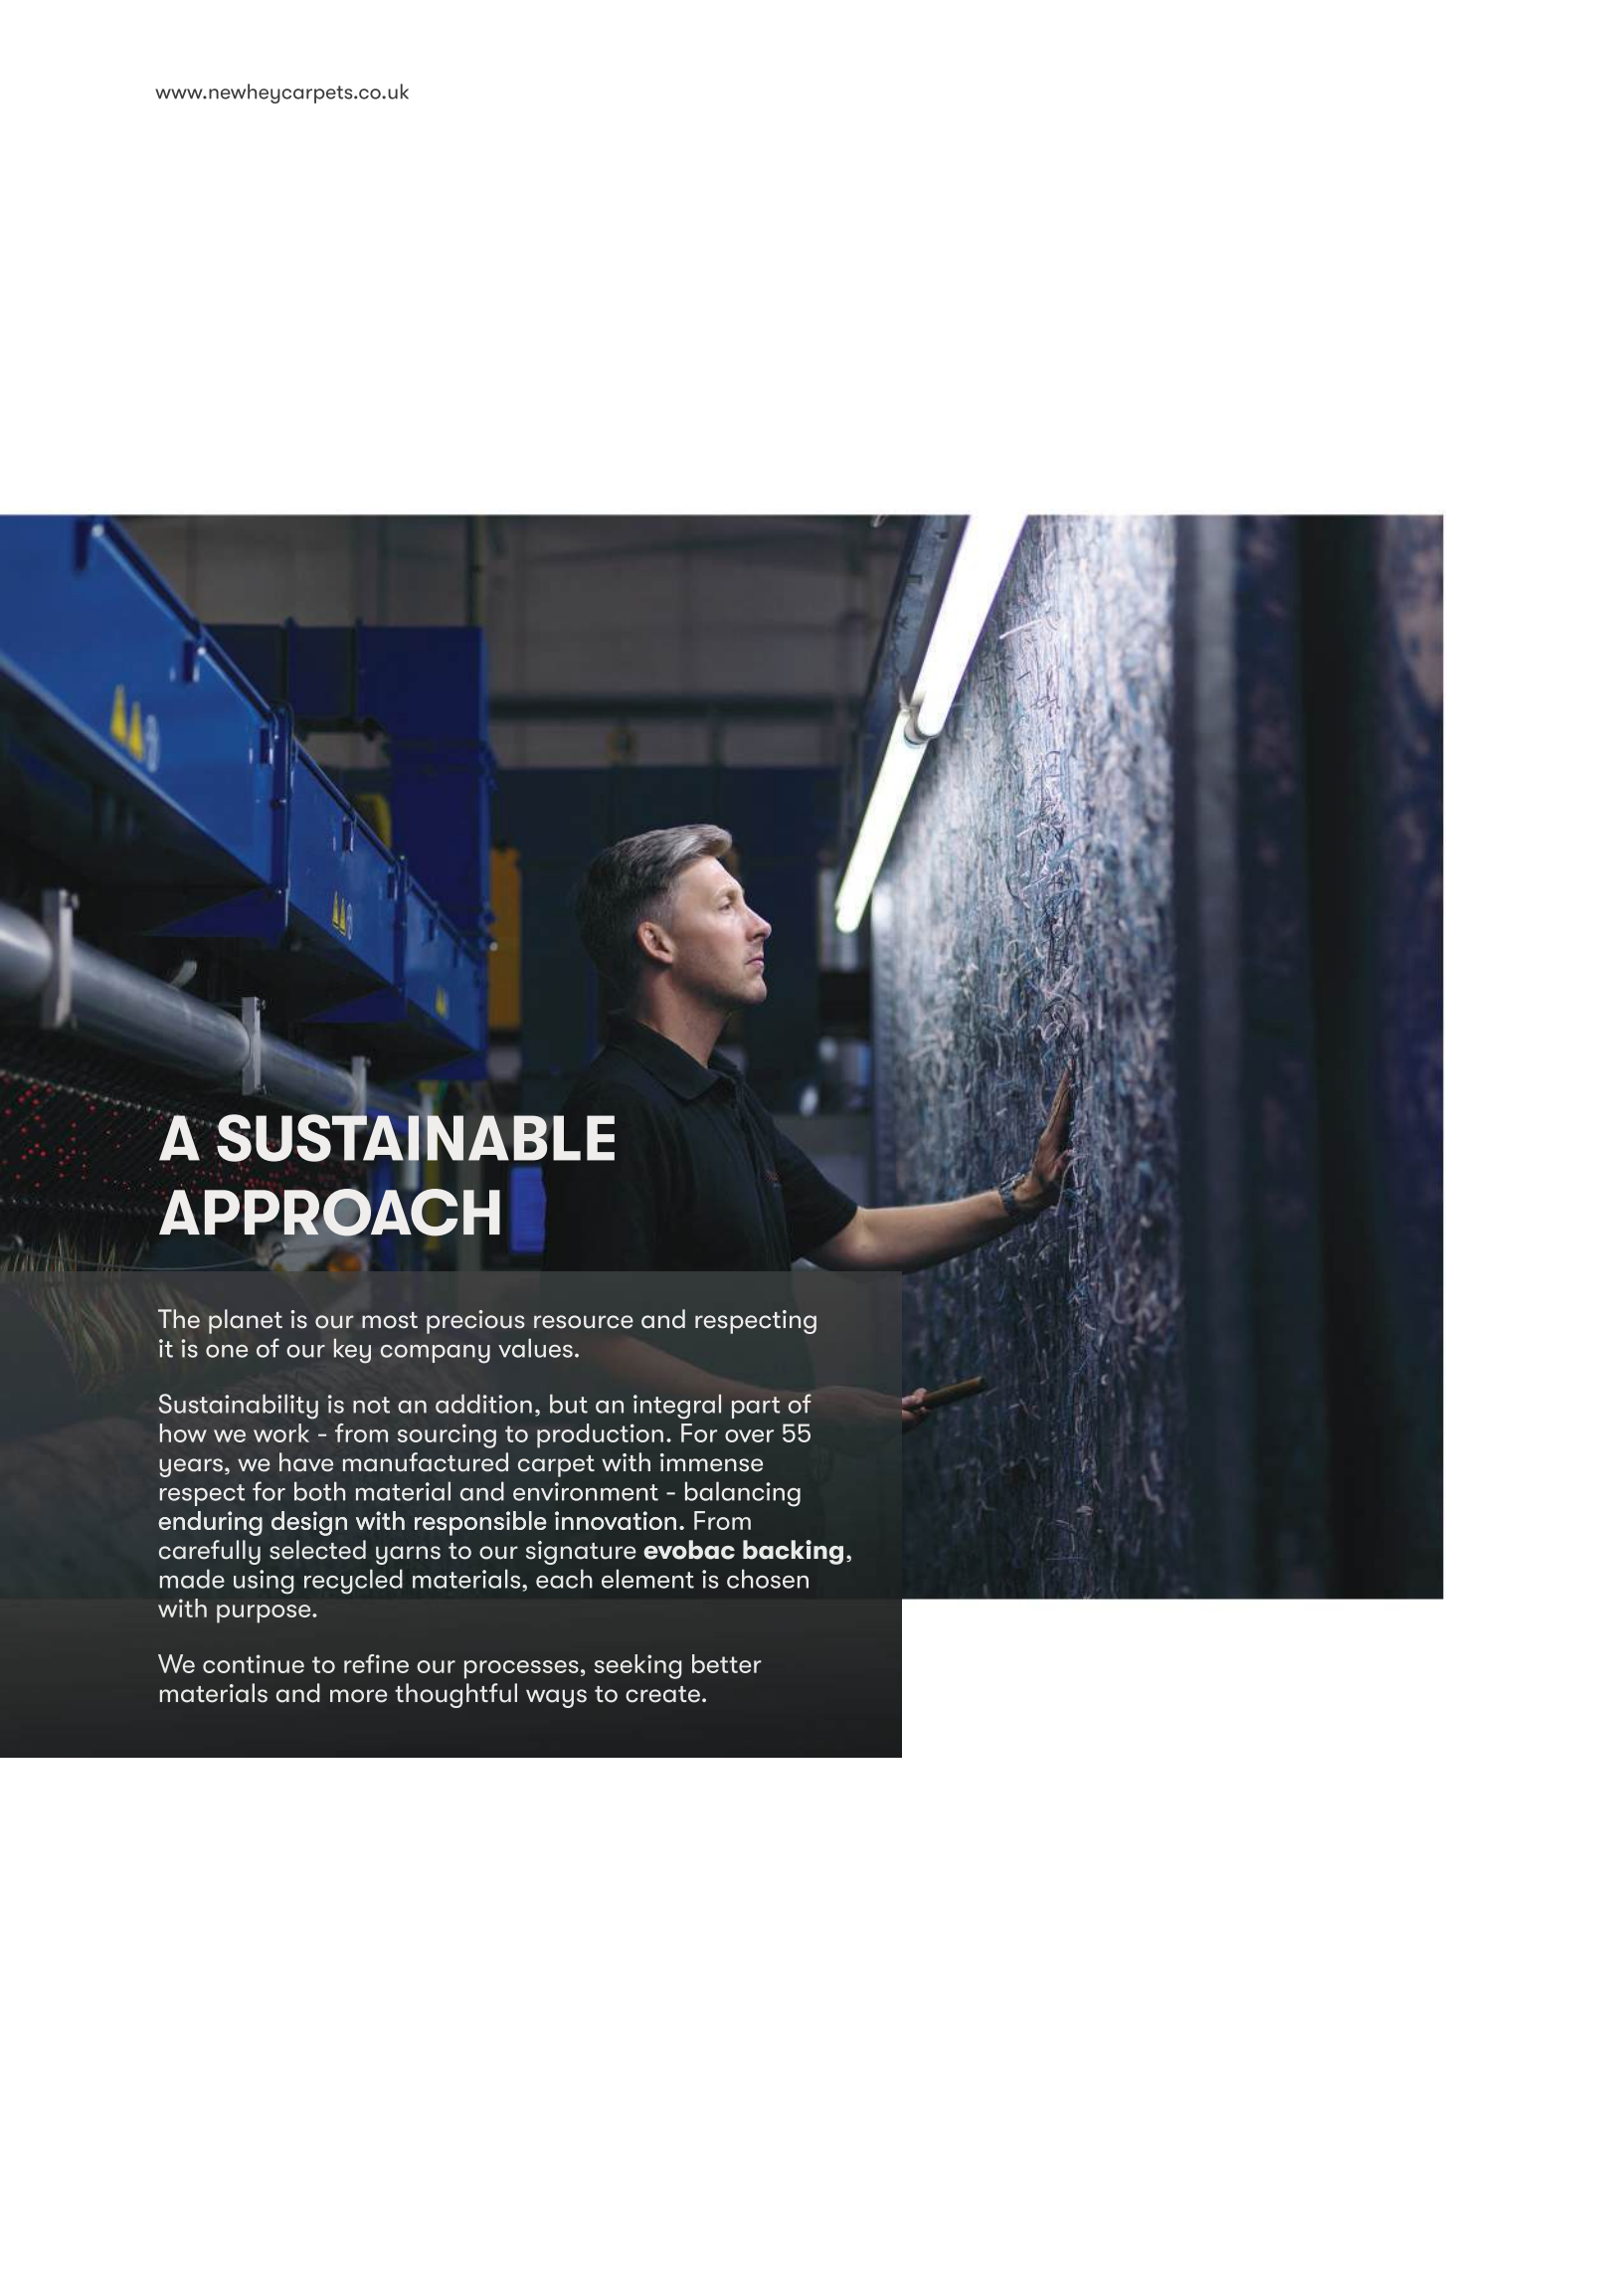

Consistent

A carefully curated range of designs and colour palettes ensures continuity across projects, with dependable repeatability from order to order - supporting cohesive schemes without variation or compromise.

Reliable

Manufactured and held in the UK, our collections provide a controlled and dependable supply solution - ensuring consistent availability, maintaining programme certainty and helping to minimise disruption.

We continually review and update our stock collections to ensure they remain relevant, commercially effective and aligned with current design trends. As a result, availability may occasionally change as new products and colours are introduced. For the most up-to-date information, we recommend visiting our website or contacting our sales team, who will be happy to assist.

A man in a black shirt is shown in profile, looking up and to the right, touching a large roll of carpet. The carpet has a dark, textured pattern. In the background, there are blue industrial machines and pipes. The lighting is dramatic, with a strong light source from the right.

A SUSTAINABLE APPROACH

The planet is our most precious resource and respecting it is one of our key company values.

Sustainability is not an addition, but an integral part of how we work - from sourcing to production. For over 55 years, we have manufactured carpet with immense respect for both material and environment - balancing enduring design with responsible innovation. From carefully selected yarns to our signature **evobac backing**, made using recycled materials, each element is chosen with purpose.

We continue to refine our processes, seeking better materials and more thoughtful ways to create.

Quality Craftsmanship Care

Behind every collection is a team of skilled designers, technicians and manufacturing specialists committed to delivering exceptional quality. Their experience, attention to detail and pride in their craft help ensure every product meets the standards our customers expect.

Responsible Sustainable Manufacturing

Responsible, sustainable manufacturing underpins every product we create. Our approach focuses on reducing environmental impact while maintaining the highest standards of quality and craftsmanship.

- Secondary backing made using post-consumer PET (evobac).
- Reduced waste through more efficient manufacturing.
- Selected collections manufactured using 100% natural wools (containing no colour dyes).
- Proudly Manufacturing in the UK.

Sustainable Innovation

Made using post-consumer PET, our secondary backing system gives discarded plastic a new purpose.

Each square metre of carpet repurposes approximately 8 plastic bottles, helping to divert waste from landfill and reduce ocean pollution. Over the course of the year, this represents around 20 tonnes of recycled PET being transformed into durable, sustainable flooring solutions.

Introduced in 2013, evobac combines sustainability with advanced manufacturing processes. While conventional carpet backing systems use 'wet' adhesive that require extended drying times and controlled conditions, evobac is uniquely applied using a hot to cold lamination process.

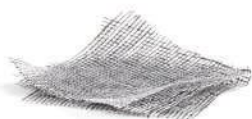

The result is a superior, longer lasting bond, while the enhanced adhesive performance ensures exceptional durability and product longevity.

How evobac is made

1. Plastic bottles are shredded into flakes

2. The flakes are converted into tape and woven

3. Next polyester fibre is needled into the woven tape

4. The result - evobac

The Benefits

Less risk of scuffing skirtings and paintwork.

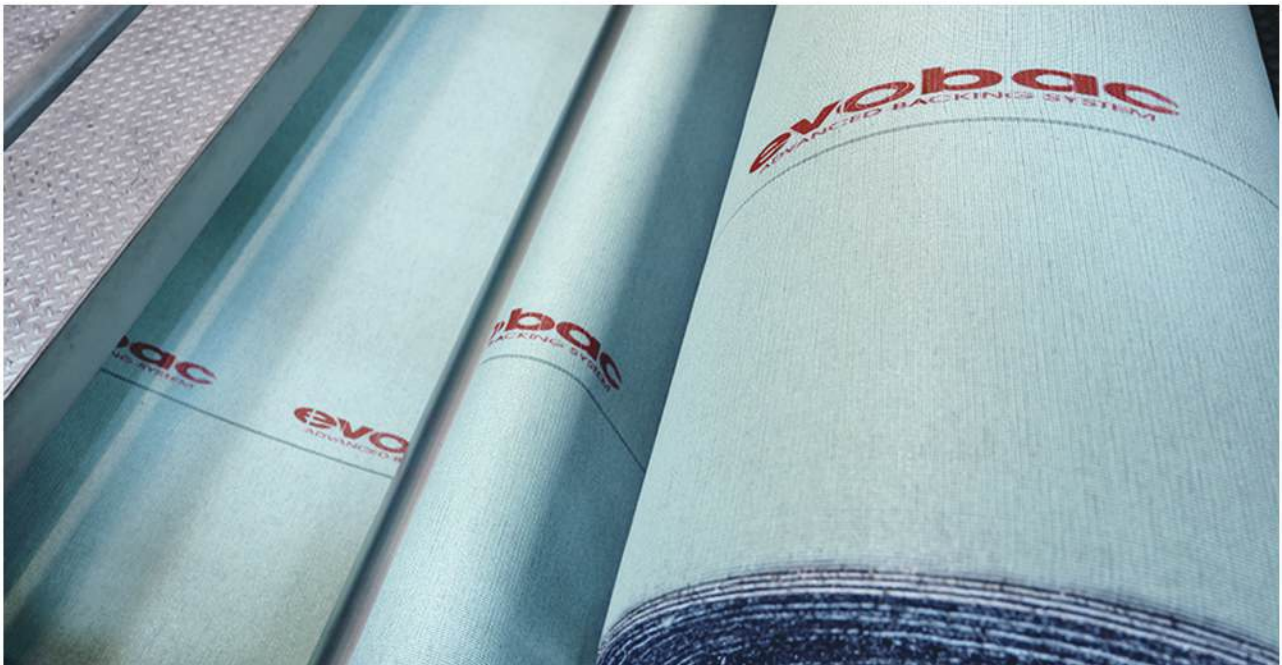

Excellent underfoot comfort.

Easier to cut, reducing wear on blades.

Compatible with conventional installation methods - stretch fit and durable stick.

Surface Pile Yarn

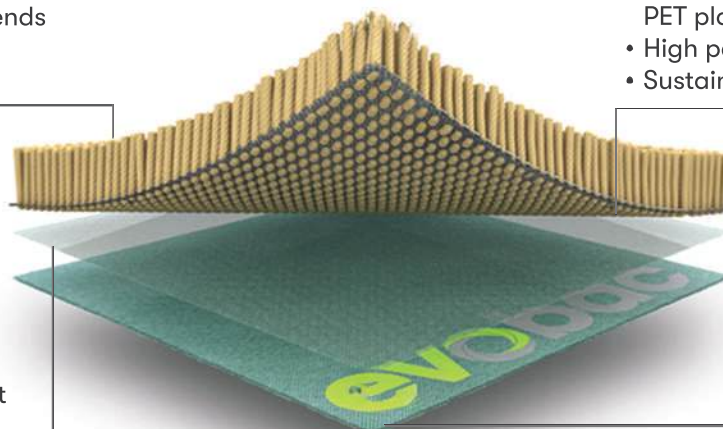

- High quality 80/20 wool nylon yarn blends
- Natural, renewable and sustainable

Primary Backing

- Post-consumer recycled PET plastic
- High performance
- Sustainable

High Strength Thermoplastic Bonding Agent

- Durable
- Guarantees against delamination

evobac

Macrame

Suitability: Heavy Commercial

Inspired by the ancient Arabic art of knotting threads into geometric patterns, our Macrame stock collection brings texture, rhythm and authenticity to interiors - offering a refined, tactile flooring solution perfectly suited to contemporary hospitality spaces and design-led specifications.

Tierra

Suitability: General Commercial

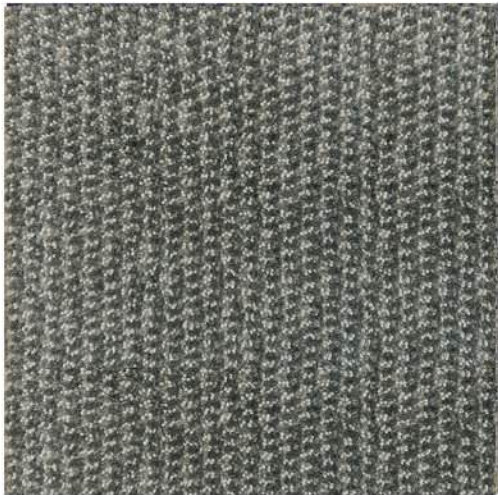

Rooted in the textures and tones of the natural world, Tierra is inspired by the quiet beauty beneath our feet. Drawing its name from the Spanish word for “earth”, the range reflects the organic richness of rural landscapes. Twist and natural undyed wools also add a textural depth that feels both refined and familiar, like something grown, not made.

STUNNING AREA RUGS

Our stock collections translate seamlessly into beautifully finished area rugs, combining the trusted performance of our broadloom carpets with the flexibility of ready-to-specify designs. Offering competitive pricing and quick turnaround times, they provide a practical yet refined solution for a wide range of interiors.

Each rug is expertly bound at our UK manufacturing facility, with a choice of narrow or wide taped edge finishes along with traditional overlocked edging, all available in multiple colour options - ensuring a consistent, high-quality result across every project.

OTHER PRODUCTS

Alongside our core stocked collections, we offer a range of additional design services, providing greater creative flexibility for projects requiring something more tailored or design specific.

Our Express Collection features over 300 designs, each available to re-colour using our 100-colour palette, plus nine natural undyed shades. Created for projects working to tighter programmes without compromising creativity, Express bridges the gap between stocked and fully bespoke solutions. With an established design library already in place, the development process is streamlined allowing projects to move forward more efficiently while still offering significant design flexibility. Each design is presented in four suggested colourways as a starting point and can be re-coloured to suit individual interior schemes.

Minimum Order Quantity: 50m²

Our Bespoke Design Service offers the opportunity to create truly individual flooring solutions tailored to the specific requirements of a project. Working closely with our in-house design team, we develop concepts from initial ideas, branding and interior themes, transforming creative briefs into durable, design-led carpet solutions for hospitality and commercial environments.

Minimum Order Quantity: 100m²

Drawing from our extensive library of designs dating back to our beginnings as a weaver in 1968, our Axminster Design Archive provides a rich source of inspiration for hospitality and commercial interiors. From classic motifs to more contemporary styles, the collection supports both bespoke development and creative exploration, offering timeless references that can be reinterpreted for modern projects.

Minimum Order Quantity: 200m²

Our Story

Newhey Carpets has been designing and manufacturing high-performance contract carpets in the UK since 1968. As a British manufacturer with over five decades of technical expertise, we bring together heritage, craftsmanship and advanced production to support some of the most creative hospitality and leisure environments.

Collaboration is central to how we work. Partnering closely with interior designers and specifiers, we translate design intent into durable, design-led flooring solutions. Through carefully engineered yarn blends, considered colour development and precise manufacturing, we help bring concepts to life - balancing creative freedom with dependable, long-term performance.

Looking ahead, responsible manufacturing remains fundamental to our strategy. By investing in lower embodied carbon processes and pioneering solvent-free backing technology — including Evobac, produced using post-consumer PET — we are reducing our environmental impact while maintaining the exceptional standards our clients expect.
